

Pennsylvania Justice Network

Annual Report

2016-2017

Director's Message

Thank you for taking the time to read the 2016/2017 JNET Annual Report. Believe it or not, the JNET portal has been on-line serving our law enforcement customers since 1998! While the applications and services provided by JNET have grown exponentially since those early days over 19 years ago, this past year was a time of re-evaluation for JNET.

In partnership with our Steering Committee and input from our users, we initiated planning sessions to develop a new vision, mission and strategies to guide JNET for the foreseeable future. We intentionally aligned our plan with the overall Office of Administration Office of Information Technology (OA OIT) plan to ensure that our future goals corresponded with the larger information technology needs of the Commonwealth.

To highlight, we identified four key strategic goals for JNET:

1. **Optimize Services:** To improve the availability, performance, accuracy and utility of JNET portal and messaging services.
2. **Transform Government:** Modernizing systems and leveraging Enterprise solutions to minimize risk.
3. **Enable Innovation through Integration:** Expanding JNET's role as a data integrator and service provider.
4. **Empower Users:** Improving the JNET user experience for both practitioners and agency administrators.

To ensure that we remain committed to these goals, I have implemented semi-annual portfolio management sessions with the JNET management team where we measure our accomplishments against the commitments articulated in our strategic plan.

I encourage you take a few moments to review our new plan. You can find a copy on the JNET public site here: http://www.pajnet.pa.gov/Documents/JNET_Strategic_Plan.pdf

I also encourage your comments and feedback. If there are services or applications that JNET could provide or improve that would make you job easier, safer or more efficient, please contact our communications team at ra-jnetcommunication@pa.gov

Thank you,

Eric Webb
Executive Director
PA Justice Network

September 26, 2017

JNET Customers

JNET serves law enforcement and public safety officials at the federal, state and local level. Typical users are police, probation officers, courts, 911 and booking centers, district attorneys and domestic relations. JNET has over 26,000 active accounts in the JNET user community as follows:

- 37** state organizations
- 44** federal agencies
- 8** business partners
- 67** counties connected to JNET
- 1,199** municipal police departments

Customer Success Stories – A Focus on Fighting Heroin

JNET receives numerous success stories throughout each year. They include small police departments expanding the use of technology to help with local crimes, identification of wanted people through facial recognition, and growing use of the Integrated Sex Offender Assessment Tracking System. These are all great successes from the federal, state and local level and we thank everyone for sharing them with JNET.

In fiscal year 2016/2017, with so much focus on the fight against heroin and the tragic deaths it is causing both in Pennsylvania and across the country, anecdotes from the FBI Violent Gang and Drug Task Force in Philadelphia are especially pertinent. They shared five stories this year with the common theme of investigations initiated due to heroin or fentanyl deaths or overdoses. One sergeant from the task force noted, “These are arrests that would not have happened without the magic of JNET.” The task force uses many JNET applications at the start of and throughout their investigations including Background Check, Photo Search, Federated Search, Facial Recognition and Traffic Stop.

The results and impacts of these stories are the real successes. Eight people were arrested and warrants were issued for two more. Additionally, the following items were seized:

- 6,443 packets of heroin (numerous tested positive for fentanyl)
- \$52, 321
- Undisclosed amounts of:
 - ✓ Cocaine
 - ✓ Crack cocaine
 - ✓ Marijuana
 - ✓ Unmarked pills
- 7 hand guns
- 1 rifle
- 1 shotgun
- 21 rounds of ammunition and a 50-round magazine
- Bill counter
- Hydraulic kilogram press
- Drug packaging and stamping equipment
- Scale

JNET thanks our user community for sharing their stories about how JNET contributes to their law enforcement and criminal justice efforts.

JNET Overview

Fiscal Year 2016/2017 Highlights

JNET updates its strategic plan annually, but it had been five years since the plan was reviewed to ensure it adequately aligns with the current needs of our office, stakeholders, customers and users. To address this, JNET completed a review and analysis of its most recent plan to ensure alignment with the Office of Administration's Office for Information Technology's plan. This effort was done through the JNET Steering Committee and included outreach to our users. The new strategic plan was completed in January 2017 and can be found on [JNET's public website](#). Highlights of the plan can be found in the next section of this report.

The ongoing Mid Atlantic Regional Information Sharing (MARIS) initiative continued in fiscal year 2016/2017 and was highlighted by the addition of arrest data from Delaware, New York, Virginia, Washington, D.C. and West Virginia. This data allows us to notify agencies that receive notifications on persons of interest if they are arrested in these states. Prior, JNET could only provide arrest information from Pennsylvania and Maryland. There have been some challenges that forced New York, Virginia and West Virginia to temporarily stop sending data, but we anticipate they will resume in the next fiscal year.

JNET completed its effort to transition applications to a responsive design platform (mobile-friendly) to make them easy to use on any device. The final four applications that transitioned in fiscal year 2016/2017 were Address Search, Warrant Search, Background Check, and Federated Search.

JNET partnered with the PA Chiefs of Police Association and PA State Police to roll out Mobile Fingerprint Identification known as Mobile ID. Mobile ID, funded through a PA Commission on Crimes and Delinquency grant, has been deployed to police departments throughout Pennsylvania and provides a hardware and secure infrastructure solution to interact with the PA State Police Automated Fingerprint Identification System (AFIS). The device allows you to take a fingerprint of someone who might not have any identification and query that fingerprint in AFIS to determine if the person has previously been fingerprinted. If there is a match, the officer will receive details about the individual back through the device.

In collaboration with the Juvenile Court Judges' Commission, JNET replaced the Juvenile Tracking System (JTS) application with the new Juvenile Information Inquiry (JII) application. The functionality of the new application is similar to the previous application, but the navigation and menus have changed. An online training course was developed to support the transition to the new application.

JNET also made several upgrades and enhancements to foundational technologies that support our applications and services. While these projects and work efforts go unnoticed to our users, they are necessary to efficiently maintain our platform, software and data exchanges.

Strategic Planning

JNET adopted a new strategic plan in fiscal year 2016/2017 to align its efforts to meet the current business and technology needs of those we serve. Highlights from the new plan are below.

Vision

To be the data integration innovation leader for Pennsylvania's criminal justice and public safety communities.

Mission

To provide highly-available, secure, and accurate data and integration services to Pennsylvania's criminal justice and public safety communities.

Goals

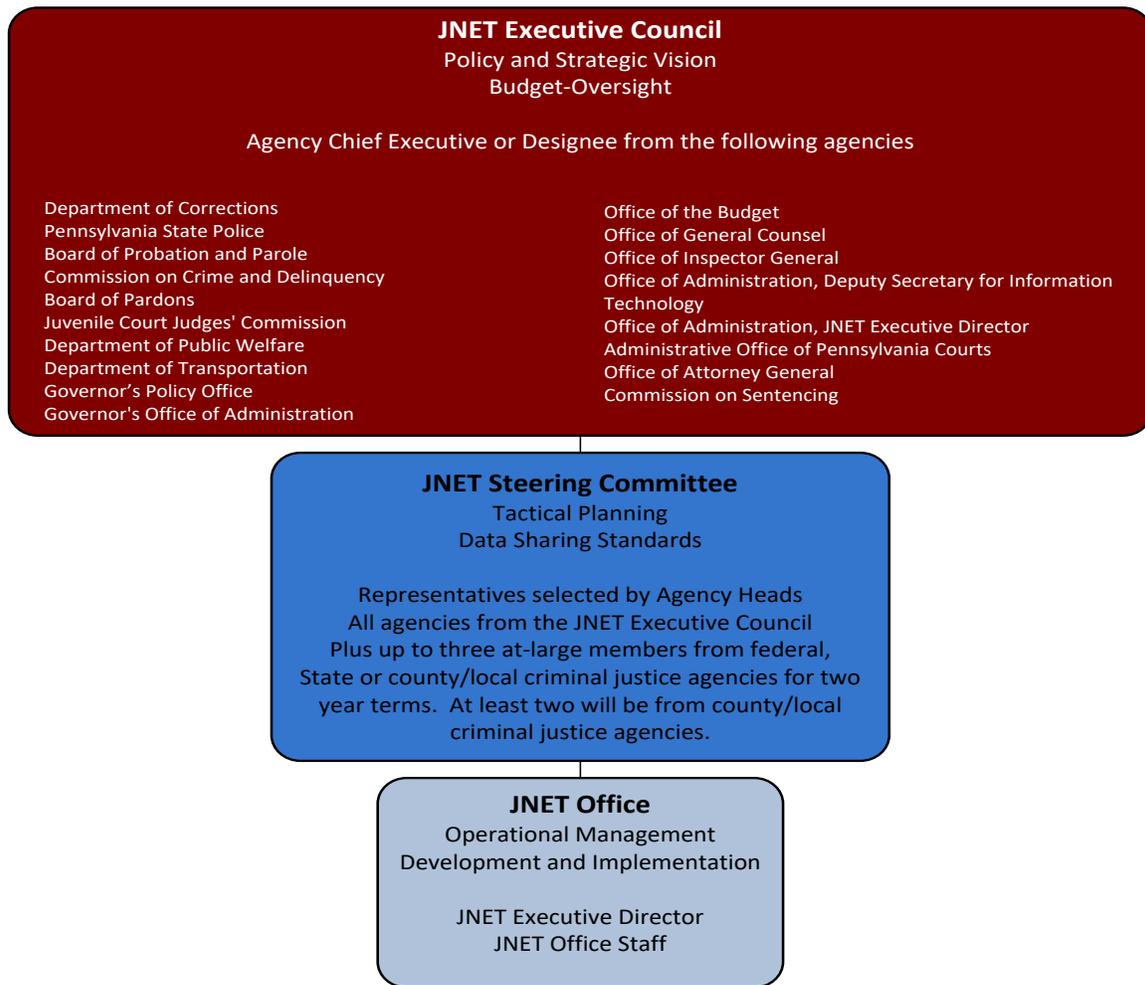

- Optimize Services
- Transform Government
- Enable Integration through Innovation
- Empower Users

Governance Structure

The purpose of the JNET governance structure is to establish a strategic direction for the investment in information solutions across the commonwealth's technology enterprise and to direct implementation of a comprehensive integrated justice information system. The JNET office worked with the steering committee to increase their input on proposed projects. Scoring proposed projects in the past was only done within the JNET office; a new scoring system was implemented to ensure JNET is selecting the right projects in the right order with all stakeholders in mind. It allowed JNET to provide more information to the steering committee on its overall portfolio and the managing of that portfolio.

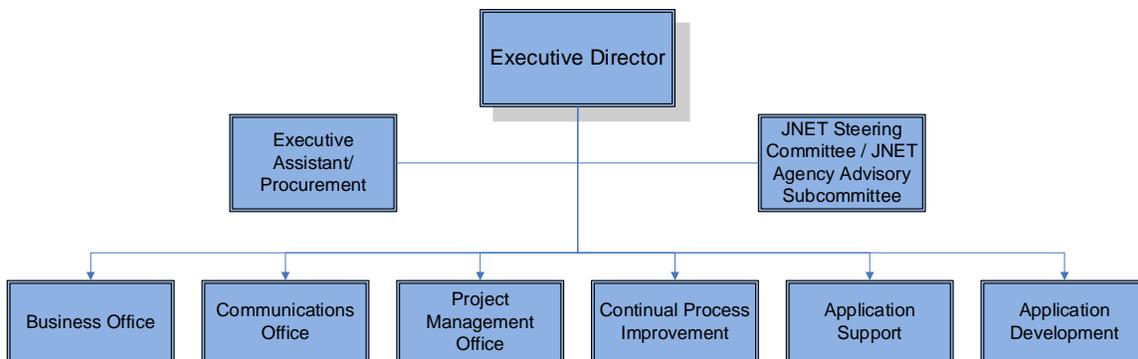

The JNET governance structure consists of an executive council, steering committee and the JNET Office. Each entity is responsible for fulfilling specific activities necessary to support JNET.

Supporting the JNET governance structure are [Executive Order 2014-02](#) and [Management Directive 245.16](#), which can be found on the [Office of Administration's website](#).

Organizational Structure

The JNET office is comprised of commonwealth employees and contracted resources with the overall total increasing and decreasing depending upon current projects, initiatives and organizational goals.

Business Office

The JNET business office is responsible for oversight and support of the JNET project life cycle and works with JNET stakeholders to elicit, analyze, communicate and validate requirements for changes to business processes, policies and information systems. The office understands business problems and opportunities in the context of the requirements and recommends solutions that enable JNET to achieve its goals.

Communications Office

The JNET communications office is primarily responsible for business relationship processes with and promoting JNET among municipal, county, state and federal agencies within the state. The communications team works with the user community and provides solutions to all issues and inquiries through the JNET service desk and other user touchpoints. They also maintain a repository that provides statistical data used for reporting and process improvement modeling purposes and oversee JNET's training efforts.

Project Management Office

The JNET project management office (PMO) performs coordinated planning, prioritization and execution of projects that are tied to JNET's overall business objectives. It also provides project management support functions in the form of software (Microsoft Project) and standardized policies and procedures. The PMO ensures that management receives accurate and timely information about all projects and major activities. Finally, the PMO provides resource allocation planning to ensure that appropriate resources are assigned to projects.

Continual Service Improvement (CSI)

The CSI Manager is responsible for regular review, monitoring and measuring of services to ensure that service levels are being met or exceeded. CSI staff also explore opportunities to increase service efficiency through refined processes and methods.

Applications Support

The JNET applications support team is responsible for maintenance and support of the applications within JNET. The application environment consists of the following core application areas: web query applications, messaging infrastructure, security platforms, service bus technologies and end-user presentation layers. Primary functional areas within applications support are web hosting and maintenance, application enhancements, web services, support and testing.

Applications Development

The JNET applications development team is responsible for developing products and services defined by our customers and JNET governance. This team is responsible for software design, construction, testing and implementation. The JNET software development process integrates software development and quality assurance practices into a flexible, yet orderly, approach. The application development team also conducts technical assessments and makes recommendations to the JNET management team concerning existing and potential software, upgrades and platforms.

Budget

JNET's total operating budget for fiscal year 2016/2017 was \$4,802,000. These funds supported JNET's reliable and secure infrastructure, ongoing application development and support, procurement of contracted resources and deployment of JNET's architectural upgrade. As depicted in the JNET budget history graph below, the budget has remained relatively level for

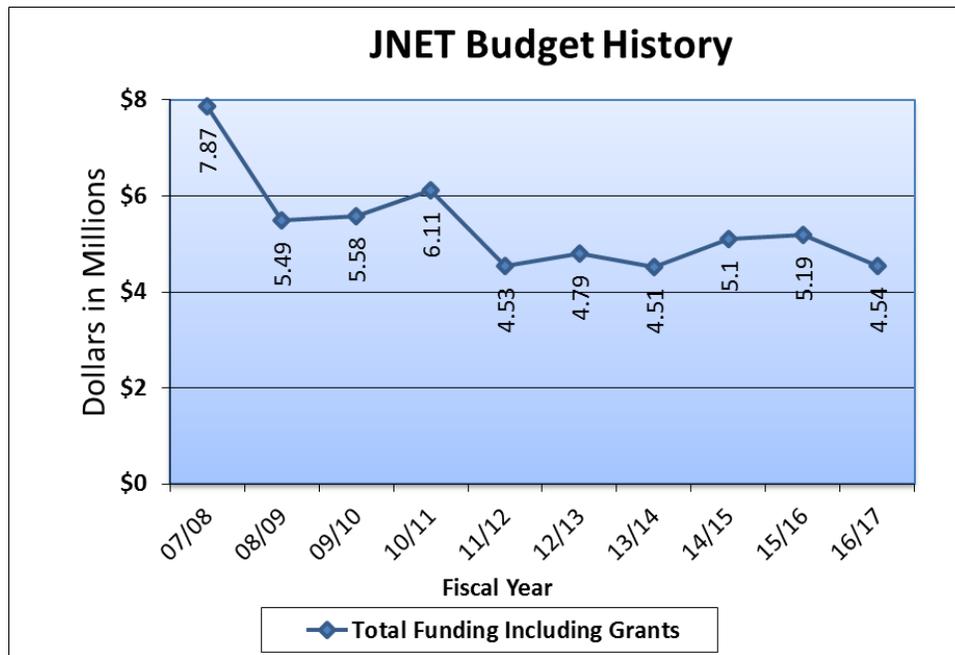

the past eight years. Additionally, JNET received state and federal grant money, \$731,000 and \$162,000 respectively, for specific projects as shown in the next table. The total budget including operating and grant funding for fiscal year 2016/2017 was \$5,695,000.

Grant Type	Project	Amount
State	Inter County Probation Transfer	\$81,000
State	Electronic Reporting Improvement*	\$150,000
State	JNET High Availability and Facial Recognition Improvements	\$500,000
Federal	Evidence Tracking	\$105,000
Federal	Mid Atlantic Regional Information Sharing	\$57,000

* Electronic Reporting was awarded during 2015/2016 and balance carried over to 2016/2017.

JNET Budget History

The graph below provides a historical look at JNET’s state funded budget over the past 10 fiscal years.

JNET Services

The Pennsylvania Justice Network (JNET) is the Commonwealth's primary public safety and criminal justice information broker. JNET's integrated justice portal provides a common online environment for authorized users to access public safety and criminal justice information. This critical information comes from various contributing municipal, county, state and federal agencies. One-time data entry has improved the effectiveness of participating agencies and has significantly improved data accuracy throughout the Commonwealth's criminal justice system. Information entered into a records management system at the onset of an investigation can now follow the offender through the criminal justice system from beginning to end. As offenders pass through the gateway of justice all the way to post-sentencing supervision, offender information flows in concert with the offender's progression.

JNET's services can be categorized into two main areas: the JNET portal and messaging, which includes notifications. The JNET service catalog was redesigned to align with the new enterprise template. The service catalog details every portal application (39) and services available (30) to JNET users and agencies.

The JNET Portal

The JNET portal is a secure mobile-friendly internet website that provides authorized users access to criminal justice data through 40 inquiry-based applications. The majority of these applications are mobile-friendly, as is the JNET website itself. Additionally, the website is used as a communication channel to provide updates about any information that impacts users such as changes, maintenance, outages and new features. A complete list of all applications, including a description and the data provider, can be found in **Appendix A**.

While many of the applications are built to pass data from a data provider to an end user, JNET has built applications that combine data from multiple providers and return that data to the end user using a single interface.

To the right are some of the most commonly used applications

available on the NET portal and their usage volumes in fiscal year 2016/2017.

Application Usage Volume for fiscal year 2016/2017

JNET Warrant Search 1,284,408	JNET Photo Search 1,119,129	JNET Traffic Stop 869,658
JNET Address Search 328,686	JNET Federated Search 422,352	JNET Background Check 423,707
Department of Labor & Industry Employment Information 167,054	Domestic Relations Warrant Search 128,197	Department of Human Services Recipient Address Search 52,434

Messaging

Messaging is JNET's ability to build system to system interfaces to produce data exchanges, event services and notifications. This allows computerized records systems within criminal justice agencies to interface with JNET to access data related to that agency. It provides interfaces that publish events, such as court case events, and allows JNET users to subscribe to notifications related to those events.

Event Messaging and Data Exchanges

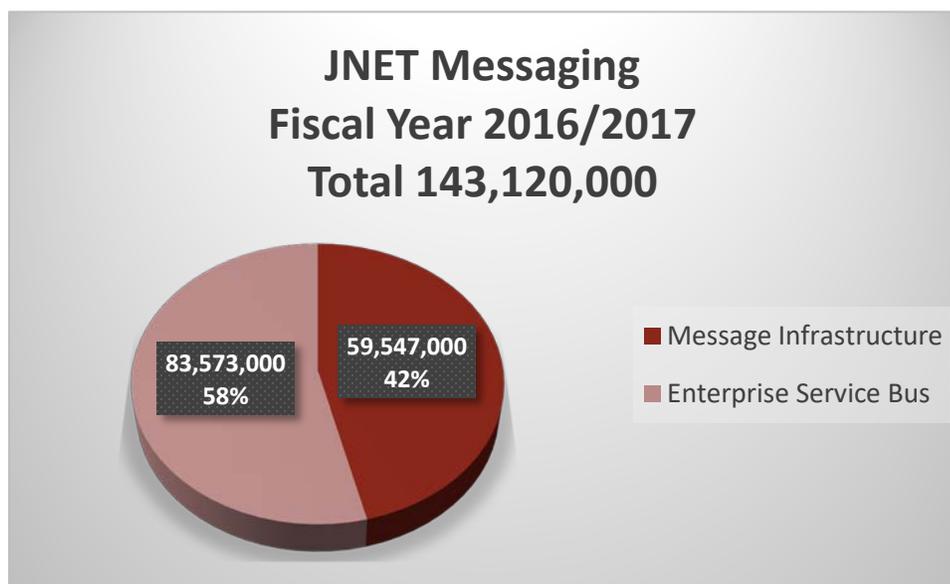

JNET Messaging Infrastructure (MI) is the message broker that allows the secure transfer of information between agency systems and users. This data exchange and event messaging model provides stakeholders with the ability to maintain ownership and control of their data systems. This has elevated county and state agency data availability, including participation in electronic data exchange and subscription to real-time event messaging services. While the MI is a retired service, it still is the vehicle used to deliver approximately 42 percent of all JNET messages and data exchanges.

JNET continues to focus on new data exchange efforts through web services via JNET's Enterprise Service Bus (ESB) instead of relying on JNET's MI. This strategy includes maintaining existing JNET MI connections to support legacy data exchanges between JNET and our business partners. However, when appropriate and feasible, JNET converts MI exchanges to web-services through the ESB.

Even with JNET focused on migrating messages to JNET ESB, the number of messages processed through JNET MI continues to increase annually. Business partners continue to publish messages through the JNET MI environment and JNET ESB also integrates with JNET MI to publish and receive messages. A complete list of all available messaging services can be found in **Appendix B**.

The transition from MI to ESB is providing JNET the opportunity to re-baseline statistical information to achieve a more reliable, repeatable method of reporting. The graphic below shows the total messages through both messaging channels for fiscal year 2016/2017.

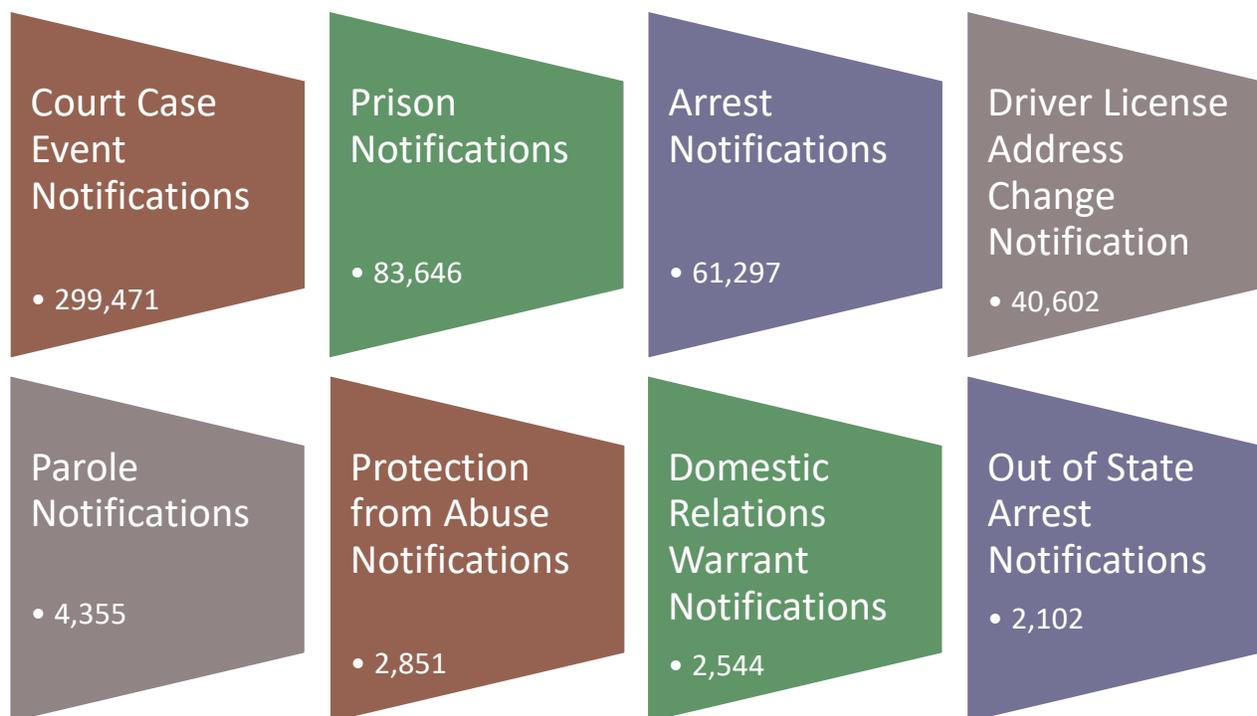

Notifications

As the hub of the commonwealth's criminal justice information sharing efforts, JNET is in the unique position of providing notification alerts of critical events within the criminal justice system to interested professionals. A prime example of such notifications is a probation officer subscribed to arrest notifications for their supervised offenders. Should one of their supervised offenders be arrested, that would trigger an email to the probation officer with minimal details. From there, the probation officer can login to their JNET notifications for a complete description.

Virtual notifications provide JNET users with the same functionality as traditional JNET notification services without the local database requirements. Authorized users can access the JNET virtual notifications application and either manually enter or upload information to populate a watch list. JNET then securely stores that information and compares it against notification event messages. Each watch list can be configured to ensure that messages matching individual persons of interest are sent to specific recipients. A complete list of available notifications can be found in **Appendix C**.

The graphic below displays JNET notifications generated by events of JNET business partners.

*Numbers include Maryland for entire fiscal year. Five additional states were added in September 2016.

**Total Notifications Delivered and Confirmed in
Fiscal Year 2016/2017**

505,543

**JNET 2016-2017 Annual Report
Appendix A
JNET Applications and Data Providers**

Application	Description
AOPC UJS Portal	This service provides access to docket sheets for Pennsylvania's Appellate Courts, Court of Common Pleas, and Magisterial District Judges. Authorized users can access the Law Enforcement Portal, local rules, court calendars and a statewide warrant search.
Crime Network (cNET)	cNET is a web-based police records management system which allows data sharing between police agencies.
DCNR ATV and Snowmobile Inquiry	Allows JNET users to search for all-terrain vehicle and snowmobile records by owner, vehicle and title information.
DOH Birth Record Inquiry	This application provides JNET users with the ability to search for and retrieve birth certificate record information in order to verify citizenship.
Domestic Relations Warrants	Users may search by individual names, cases, or entire counties for a list of outstanding child support warrants from the Pennsylvania Child Support Enforcement System (PACSES). Information returned includes the amount of arrears owed at the time the warrant was issued as well as contact information for the issuing jurisdiction.
DHS Recipient Address Inquiry	This system allows JNET users to enter search criteria to determine if an individual of interest is actively receiving cash or food stamp benefits from the department of human services.
Electronic Reporting Statistics	Allows JNET users to query reports from the electronic reporting data provided by county probation offices and county prisons.
ISOATS	The application is used to track offenders and exchange court information from the courts.
JNET Address Search	Provides practitioners with access to comprehensive address information from 11 distinct data sources through a unified search application.
JNET Automated Registration System	Allows JNET Sponsors to generate electronic invitations to new JNET users. The new user receives an email notification and clicks on an embedded link to activate their new account.
JNET Background Check	The JNET Background Check allows JNET criminal history (CH) users to quickly search PSP criminal history records as well as warrants from the AOPC and PACSES.

Application	Description
JNET Federated Search	Provides AOPC Docket information, WebCPIN photos, PBPP and county Probation/Parole information, DOC and county jail information, PSP criminal history, and PCS sentencing information to JNET users through one interface.
JNET Photo Search	This application allows users to make a single inquiry and automatically search for photographs from both PennDOT and WebCPIN – which contains photographs from several other systems including: HIDTA, DOC, PBPP, county prisons and county probation offices. Search results include a link to a map depicting the location of the subject’s home address and surrounding area.
JNET Traffic Stop	Allows a law enforcement officer to obtain vehicle and driver information using the least amount of information available. CH users will be able to run transactions in PA and other states. CJ users are restricted to Pennsylvania drivers and vehicles.
JNET Warrant Search	The JNET Warrant Search allows users to query warrant information from CLEAN, NCIC, AOPC and PACSES, through a single search.
JNET Warrant Correction	Provides users with the ability to correct and resubmit warrants that have been rejected by CLEAN or NCIC, as opposed to manually re-entering the entire warrant.
JNET Facial Recognition System (JFRS)	Allows JNET users to compare an unknown suspect’s image to over 35 million images from PA databases, including PennDOT. JFRS can be used on mobile devices allowing users to upload images from the field for instant comparison.
JNET User Provisioning System	The user provisioning system allows users to request security roles for further access to specific applications. Similar to the automated registration application, user requests for additional security roles are routed to approvers for review.
Juvenile Information Inquiry (JII)	This Juvenile Court Judges’ Commission application enables authorized users to view pertinent juvenile justice information via JNET. JII provides juvenile information, allegation information, disposition information and other data related to allegations and dispositions. JNET provides authentication and authorization of criminal justice users to the application.
Learning Management System (LMS)	An online system that provides both basic and advanced user training. Provides training modules for each application available on JNET. Allows JNET Registrars to track users’ completed trainings and progress.

Application	Description
Law Enforcement Justice Information Web Interface	Allows all JNET users to query records contained within LEJIS which houses index information from hundreds of police departments from across the commonwealth.
License Plate Reader (LPR) Suspended and Expired	Daily file from PennDOT of license plates expired or suspended
Notifications	<p>JNET Notifications allow users to subscribe to real-time event messages for comparison against offender watch-lists. When an event message is published, it is compared against watch-list records and the subscriber is automatically notified via email. When a significant event such as an arrest, disposition, want, warrant, state parole violation, PennDOT change of address or death occurs, users are alerted to check secure JNET for detailed event information.</p> <p>Virtual notifications are used by federal and municipal users without direct access to JNET through the commonwealth network. Virtual notifications provide these users with the same functionality as traditional JNET notification services without the local database requirements.</p>
PA Department of Labor & Industry Employment Query	The PA Department of Labor & Industry Employment Query allows users to access employer data and information and if requested wage data from the Unemployment Compensation Management System repository.
PCCD Constable Query	The Pennsylvania Commission on Crime and Delinquency Constable Query allows users to search a database containing certified constable information for all Pennsylvania counties.
PCCD Sheriff/ Deputy Sheriff Query	The Pennsylvania Commission on Crime and Delinquency Sheriff/ Deputy Sheriff Query allows users to search a database containing certified deputy sheriff information for all Pennsylvania counties.
PennDOT In-Transit Tag	The PennDOT In-Transit Tag search allows authorized JNET users to query PennDOT's in-transit tag database. In-transit tags are 30 day tags that are granted by PennDOT to the purchaser of a vehicle who resides outside of Pennsylvania. These are cardboard tags that are to be used only from the time the non-resident purchases the vehicle in Pennsylvania until he or she registers it in their home state.
PennDOT License/Registration Pickup	This application provides JNET users with access to PennDOT's lists of expired and revoked driver's licenses and vehicle registrations. Search results include a link to map depicting the location of the subject's home address and surrounding area.

Application	Description
PennDOT Photos/History	Provides JNET users with access to PennDOT's current and historical driver's license and photo records, as well as certified driving records. Also includes license suspension information, emergency contact information and CDL medical certification information.
PennDOT Vehicle Inspection and Emissions	The PennDOT vehicle inspection and emissions query allows JNET users the ability to quickly obtain inspection or emissions station information. It also assists law enforcement in identifying fraudulent inspection stickers.
PennDOT Vehicle Registration	Provides JNET users with access to PennDOT's certified vehicle records.
Pre-sentence Investigation (PSI) Index	Allows authorized JNET users to search for AOPC pre-sentence related court documents by defendant information, docket number or county.
Protection from Abuse Database (PFAD)	The Protection from Abuse application searches the PFA Database from the Pennsylvania Coalition Against Domestic Violence.
PSP CLEAN PortalXL	Provides JNET criminal history (CH) users with a fully functional web-based PSP CLEAN terminal. Provides access to the Pennsylvania Sex-Offender Registration Tool (PA SORT) in addition to numerous federal law enforcement data sources.
Sentencing Guidelines Software (SGS Web)	This is a web-based application developed by the Pennsylvania Commission on Sentencing (PCS). SGS Web provides official sentencing guidelines, calculations and history to the courts of Pennsylvania via JNET.
Statistical Reports	Includes nine reports summarizing usage of the JNET system by county, hourly analysis of JNET usage, successful warrant submissions, county jail and adult probation reporting, pre-sentence information, and JNET notification use.
User Transaction Log Lookup Report	Allows users to easily search through log files to document their JNET transactions. This application includes all user log entries collected by JNET.
WebCPIN	This web based application provides access to the Commonwealth Photo Imaging Network (CPIN) which includes over five million photos from arrest/booking centers, state and county probation and parole, state and county prisons and NY/NJ High Intensity Drug Trafficking Area (HIDTA). WebCPIN provides the functionality to create photo lineups, perform investigative searches and print wanted/missing person posters.

Application	Description
Web Services Monitoring Tool	The Web Services Monitoring tool provides users with the status of JNET web services. The application displays availability of the web service, as well as the date and time of the last successful transaction processed for that specific system.

**Appendix B
JNET Messages**

Web Service	Type of Service	Description
Address Service	Query Service	While manually running queries through multiple systems can be time-consuming and mistake-prone, the JNET Address Service provides you with address information from 11 different sources with a single submission to: AOPC, County Adult Probation and Parole, County Prisons, DOC, DHS, DRO warrants, JCJC, PBPP, PennDOT, PSP and WebCPIN.
All-Terrain Vehicle (ATV) and Snowmobile Service (DCNR)	Query Service	With this service, you can search for All-Terrain Vehicle (ATV) and snowmobile registrations through the Pennsylvania Department of Conservation and Natural Resources (DCNR) Snowmobile/ATV Section returning: owner, co-owner, address, registration and title information related to the vehicle in question.
Arrest Message (PSP)	Event Message Service	With this service, you can subscribe to messages from the Pennsylvania State Police (PSP) regarding all arrests where the individual has been fingerprinted. All fingerprints at arrest and booking are processed through the Automated Fingerprint Identification System (AFIS) and are then incorporated into the PSP Commonwealth Law Enforcement Assistance Network (CLEAN) and made available to JNET and agency subscribers to the Arrest Message.
Birth Certificate (DOH)	Request/Reply Service	With this service, your system can search for birth records through the Pennsylvania Department of Health (DOH). All birth certificates filed with the Department of Health are available for searching by basic demographic information.
Child Support Warrant (DHS)	Event Message Service	The Department of Human Services has created a mechanism to publish information regarding warrants originating with failure to pay child support through the Department of Human Service (DHS) Pennsylvania Child Support Enforcement System (PACSES). The data is then available to JNET, who, by request is able to send messages to subscribing agencies as specific Child Support warrants are issued and served.

Web Service	Type of Service	Description
Court Case Event (CCE) Message (AOPC)	Event Message Service	<p>The Administrative Office of Pennsylvania Courts (AOPC) processes all Magisterial District Judge (MDJ) and Common Pleas Court (CP) criminal court cases. The AOPC has created a mechanism to publish in either the MDJ or CP system, Court Case Event (CCE) information as an event is triggered. It is then available to JNET, who, by request is able to send messages to subscribing agencies as specific CCEs occur.</p> <p>MDJ: Criminal Case Calendar, Case Initiation, Lifecycle, Sentencing/Disposition/ Warrant CP: Bind Over, Calendar, Lifecycle, Sentencing Disposition, Warrant</p>
Court Case Request/Reply (AOPC)	Request Reply Service	<p>The Administrative Office of Pennsylvania Courts (AOPC) processes all Pennsylvania criminal court cases. Agencies may submit an Offense Tracking Number (OTN) request through this JNET Web Service to receive a reply containing up-to-date case information from AOPC related to the OTN.</p>
Deceased Person Message (DOH)	Event Message Service	<p>The Pennsylvania Department of Health (DOH) serves as the official repository for all records of deceased persons for the Commonwealth of Pennsylvania. The DOH provides a monthly update of deceased person records, which JNET then batch processes through the Messaging Infrastructure and Notification Service. Agencies may subscribe to these messages.</p>
Deputy Sheriff and Constable Contact Information (PCCD)	Event Message Service	<p>The Pennsylvania Commission for Crime and Delinquency (PCCD) has created a mechanism to publish contact information for Deputy Sheriffs or Constables. The data is then available to JNET, who, by request is able to send messages to subscribing agencies as changes such as adding, updating or deleting are made to the information records.</p>
Driver Service (PennDOT)	Query Service	<p>The Pennsylvania Department of Transportation (PennDOT) issues, maintains and retains records for all driver's licenses in the Commonwealth of Pennsylvania. PennDOT allows JNET to broker this information to subscribing agencies. The agency system can then query PennDOT driver information, history, photographs and verification of license records securely through JNET. Positive matches are then returned to the agency system.</p>

Web Service	Type of Service	Description
Driver's Address Change Message (PennDOT)	Event Message Service	PennDOT receives tens of thousands of driver's address updates each week. As PennDOT processes each change of address, a message is sent securely to JNET. The message is then made available to JNET users through the JNET Messaging Infrastructure (MI) JNET Notification Service.
Electronic Filing (E-Filing) Court or Case Filing (AOPC)	Request/Reply Service	The Administrative Office of Pennsylvania Courts (AOPC) allows local agencies to electronically file (e-file) any proceeding that initiates a new case or affects an existing case to the appropriate court (via JNET). E-Filings include criminal complaints, traffic citations, and docketing events.
Electronic Reporting (ER) Adult Probation and Parole (ER2P) (PBPP)	Event Message Service	<p>JNET ER2P is designed to allow County Adult Probation and Parole systems to implement and deploy a web service client in order to publish data to JNET. It is not a subscription to the web service or a query service. For these, see the Electronic Reporting [ER] Inquiry and Subscription Services. (ER2P is only available for participation by County Adult Probation and Parole agencies.)</p> <p>When your Probation and Parole Department participates in this system, the JNET Electronic Reporting (ER) functionality then provides adult probation and parole information from County Probation and Parole offices to the Pennsylvania Board of Probation and Parole (PBPP) and the data is then made available to agencies subscribing to the JNET ER service.</p>
Electronic Reporting and Inmate Information (ERII) County Prison (DOC)	Event Message Service	<p>JNET ERII is designed to allow County Prison systems to implement and deploy a web service client in order to publish data to JNET. It is not a subscription to the web service or a query service. For these, see the Electronic Reporting [ER] Inquiry and Subscription Services. (ERII is only available for participation by County Prisons.)</p> <p>When your Prison participates in this system, the JNET Electronic Reporting (ER) functionality then provides Prison information to the Department of Corrections (DOC) and the data is then made available to agencies subscribing to the JNET ER service.</p>

Web Service	Type of Service	Description
Electronic Reporting (ER) Subscription Service (DOC, PBPP)	Event Message Service	The JNET ER Subscription Service allows authorized agencies to become secondary recipients of County Probation and Parole (ER2P) or County Jail (ERII) messages. The ER Subscription Service brokers and publishes an exact copy of the original incoming message to authorized subscribers in a National Information Exchange Model (NIEM) XML format. The subscribing agency may then filter the data, using what fields are relevant for its business needs.
Employment Service (DLI)	Query Service	<p>The Department of Labor and Industry (DLI) Employment Service allows systems to search for employer and wage information from the DLI Unemployment Compensation Management System (UCMS).</p> <p>Employers covered under the PA Unemployment Compensation (UC) Law are required to file quarterly reports showing wages paid to employees. The data extracted from these quarterly reports are stored in the UCMS. The UCMS retains the last 16 quarters (4 years) of employee records submitted by the employer.</p>
Fish and Boat Registration Service (Fish and Boat Commission)	Query Service	This service allows your agency system to query and receive registered boat, owner, registration, and alert information through JNET from the Pennsylvania Fish and Boat Commission.
PA State Corrections and Parole Event Message	Event Message Service	Agencies may subscribe to various events published by the Pennsylvania Department of Corrections and Board of Probation and Parole. JNET makes this information available to subscribing agencies as specific events occur.
Juvenile Court Case Event (CCE) Message (AOPC)	Event Message Service	The Juvenile Court Case Event publication (CCE) process publishes all Juvenile court case data concerning court events, case participants, offense(s), disposition, sentencing, juvenile detention and warrants to court case subscribers
Offender Inquiry	Query Service	The Offender Inquiry Service allows authorized systems to access County Offender, County Inmate and State Parole information through one federated inquiry. This system-to-system service provides flexibility in that queries may be for specific individuals or a search for all offenders contained in

Web Service	Type of Service	Description
		one or more counties as well as in one or more of the contributing databases.
Originating Agency Identifiers (ORI) Update Message (PSP)	Event Message Service	<p>An ORI is used by the Federal Bureau of Investigation (FBI) to track all transactions being run through the federal National Crime Information Center (NCIC). The Pennsylvania State Police (PSP) office oversees all Pennsylvania ORIs on their Computerized Criminal History Records Information (CCHRI) system using an ORI master index.</p> <p>The ORI Update Message allows agencies without direct access to the index to subscribe to up-to-date ORI information.</p>
Parole Violation Message (PBPP)	Event Message Service	<p>The Pennsylvania Board of Probation and Parole (PBPP) supervises all individuals released on parole from a State Correctional Institution (SCI), special cases from Commonwealth Common Pleas (CP) Courts, as well as cases transferred into Pennsylvania from other jurisdictions. When Offenders under the supervision of PBPP are found in violation of the terms of their supervision, the PBPP updates the offender's status in their system and shares the update with JNET once a day at a designated time.</p>
Photo Service (PCCD, PennDOT)	Query Service	<p>This service allows your agency system to access PennDOT Driver Photos and History as well as Web Commonwealth Photo Imaging Network (Web CPIN) photographs through one federated inquiry. Results include driver and offender demographic information, address information, license information, criminal case information, and physical characteristics.</p>
Sentencing Guideline Request/Reply (PCS)	Request/Reply Service	<p>With this service, your system can query the Pennsylvania Sentencing Commission (PCS) and receive a reply with information relating the specific sentencing guideline for which you are searching.</p>
Sentencing Guideline Message (PCS)	Event Message Service	<p>This service allows your agency to subscribe to Sentencing Guideline information as it is published by the Pennsylvania Commission on Sentencing (PCS).</p>

Web Service	Type of Service	Description
Vehicle Service (PennDOT)	Query Service	The Pennsylvania Department of Transportation (PennDOT) issues, maintains and retains records of all vehicle registrations for the Commonwealth of Pennsylvania. PennDOT via JNET brokerage, allows subscriber systems to query PennDOT vehicle records. When a potential match is made, the service provides information that can then be used for forms and reports such as vehicle registration, history, title, owner, and lessee information.
Wanted Person Message (PSP)	Event Message Service	The Pennsylvania State Police (PSP) process and submit wanted persons to the National Crime Information Center (NCIC) and share a message with JNET.
Warrant Service (AOPC, PSP, DHS)	Query Service	The Warrant Service allows JNET subscribing agencies to access data from the Pennsylvania State Police (PSP) Commonwealth Law Enforcement Assistance Network (CLEAN), Administrative Office of the Pennsylvania Courts (AOPC) and Pennsylvania Child Support Enforcement System (PACSES).
Watch List Query Service	Notification Service	Watch List Query Service requires an agency to develop and host a Watch List Query Service on their system using specifications provided by JNET. Whenever JNET receives event information from Pennsylvania state agencies or business partners, JNET invokes the agency's service to deliver that event information. The agency Watch List Query Service would then query the agency's own database in an attempt to match any individuals received from JNET. If any matches are found, the service would indicate this to JNET in a response and JNET would then send a notification to designated agency recipients.
Watch List Update Service	Notification Service	When utilizing the Watch List Update Service, JNET maintains an agency's watch list of persons of interest. JNET compares incoming event messages against the watch list and delivers notification events to designated agency recipients. The agency would call JNET's Watch List Update Service to maintain their watch list by adding or removing individuals from the watch list hosted at JNET

Appendix C JNET Notifications
