

## JNET Vision

To be the data integration innovation leader for Pennsylvania's criminal justice and public safety communities.

## JNET Mission

To provide highly-available, secure, and accurate data and integration services to Pennsylvania's criminal justice and public safety communities.

## Business Partners & Data Sources

- Commonwealth Law Enforcement Assistance Network (CLEAN)
- Law Enforcement Enterprise Portal (LEEP)
- National Crime Information Center (NCIC)
- National Law Enforcement Telecommunications System (NLETS)
- Interstate Identification Index (III)
- Interstate Photo Imaging Network (IPIN)
- Pennsylvania State Police (PSP)
- Overdose Drug Information Network (ODIN)
- Administrative Office of Pennsylvania Courts (AOPC)
- Pennsylvania Chiefs of Police Association (PCPA)
- Pennsylvania Board of Probation and Parole (PBPP)
- Pennsylvania Department of Corrections (DOC)
- Pennsylvania Department of Transportation (PennDOT)
- Pennsylvania Juvenile Court Judges' Commission (JCJC)
- Pennsylvania Commission on Sentencing (PCS)
- Pennsylvania Commission on Crime and Delinquency (PCCD)
- Pennsylvania Department of Human Services Automated Child Support Enforcement System (PACSES)
- Department of Human Services (DHS)
- Department of Health (DOH)
- Department of Labor and Industry (DLI)
- Over 100 county adult probation and prison record management systems

## Pennsylvania Justice Network

### Pennsylvania's Public Safety and Criminal Justice Portal

**The Pennsylvania Justice Network (JNET)**, an office within the Pennsylvania Office of Administration, Office of Information Technology, Public Safety Delivery Center, provides a common online environment for authorized users to access public safety and criminal justice information. This critical information comes from various contributing municipal, county, state and federal agencies. Information available on JNET is protected by policy, advanced authentication, secure connectivity and role-based entitlements. JNET serves its customers through both portal and messaging services.

One-time data entry has improved the effectiveness of participating agencies and has significantly improved data accuracy throughout the commonwealth's criminal justice system. Information entered into a records management system at the onset of an investigation can now follow the offender through the criminal justice system from beginning to end. As offenders pass through the gateway of justice all the way to post-sentencing supervision, offender information flows with the offender's progression.

**"This would not have happened without the magic of JNET."**

## JNET Portal

The JNET portal is a secure mobile-friendly website that provides authorized users access to criminal justice data through 39 applications. Highlights include:

**PennDOT Records** includes driver photos, demographics, certified driving records and vehicle registrations.

**Traffic Stop** provides driver and vehicle information combined with information on active warrants and hot file information.

**Warrant Search** returns warrant results from PA State Police, the National Crime Information Center, PA courts and domestic relations and child support warrants.

**Warrant Correction** increases the acceptance of warrants in state and federal repositories by allowing users to correct rejected warrants assigned to their agency.

**Federated Search** returns data from several justice agency sources including courts, county prison and probation, state corrections and probation, sentencing guidelines, booking information and criminal history.

**Unified Judicial System Portal** gives JNET users the ability to access important case, court, participant and warrant information not available to the public.

**Commonwealth Photo Imaging Network (WebCPIN)** is used to create photo lineups, perform investigative searches and print wanted/missing person posters.

**PSP CLEAN PortalXL** provides online access to PSP CLEAN including PA SORT (Sex Offender Registration Tool), NCIC, National Law Enforcement Telecommunications System (NLETS) and the Interstate Identifications Index (III) records.

**Overdose Information Network** allows law enforcement to submit and track overdoses, naloxone administration and identifiable drug markings.

**PA Chiefs of Police Association Facial Recognition** users can compare an unknown suspect's image to over 35 million images from several databases including arrest photos, corrections, probation and PennDOT.

## JNET Messaging

JNET's robust service oriented architecture supports data exchanges, event services and notifications between local, state and federal criminal justice agencies. JNET's flexibility ensures that electronic record exchanges meet the specific business needs of its criminal justice partners.

Examples of JNET messaging events or topics include: arrests, warrants, photographs, court case events (case initiation, case bind-over, case disposition), address changes, county or state jail admissions or releases, and Megan's Law status updates. JNET users can subscribe to notifications related to those events as well.

JNET notification services allow agencies or individuals to subscribe to customized events to meet their specific business need. Whether it is a probation officer supervising active clients or a police detective monitoring outstanding warrants, JNET notification services can be customized to ensure that the right information is provided to the right person at the right time.

**“Notifications allow parole officers to detain, arrest and revoke offenders who, in the past, have gotten away on violations due to the PO being unaware of new offenses. Notifications provide real time updates so agents can be proactive, which results in increased prosecution and enhanced public safety.”**

*Lester Custer, Somerset County Adult Probation Supervisor*
