

Resources for Criminal Justice Users

The Pennsylvania Justice Network (JNET) provides authorized users with access to public safety and criminal justice information from numerous federal, state and local sources. Access to specific data sources is dependent upon your Agency Type and individual Security Role within JNET.

The following data resources are available to *most* Criminal Justice Users *upon activation of their JNET account*.

Criminal Justice User (CJ) – Provides access to all criminal justice information available within JNET, but not PSP CLEAN or NCIC Criminal History Record Information (CHRI). May be subject to Criminal History Record Information Act (CHRIA) statute provisions and audit requirements. This is the default security role for JNET users who belong to a Criminal Justice or Law Enforcement agency before they complete CLEAN Certification and request the Criminal History security role. Users assigned this role must work for a Criminal Justice Agency as defined by CHRIA.
